From: **David Frazer, UASI Risk & Information Sharing Project Manager**

Date: **November 14, 2013**

Re: **Item #7: Regional Public Safety Information Sharing Update**

Staff Recommendation:

None.

Action or Discussion Items:

Discussion only.   This item updates the Approval Authority on regional public safety information sharing initiatives supported with UASI funds. The last update was provided in May 2013. The Management Team will provide another update in six months to ensure that progress continues as expected.

Discussion:

The table below provides a status update on regional public safety information sharing systems by UASI Operational Area. Highlights include:

- Alameda County law enforcement agencies have agreed to join ARIES, increasing the number of agency users by 18.
- Contra Costa County is leading a project to re-architect the current data warehouse to provide a more efficient and robust system. This work has delayed the full integration of ARIES and CopLink by another six months.
- San Francisco PD is currently working with FBI N-DEX to integrate their data. N-DEX will exchange this data with CopLink and then ARIES after full of integration of CopLink and ARIES.

Status of Regional Data Sharing Systems by UASI Operational Area, October 2013

UASI Operational Area	Regional Data Sharing System	Extent of Regional Data Sharing	TOTAL UASI Investment FY09-FY13	UASI FY13 Investment	Ongoing Cost Estimate	Notes
San Mateo Marin Sonoma Napa	CopLink – West Bay Node	Marin not yet connected but will be in a matter of weeks. Full data integration with CopLink West Bay and South Bay Nodes, as well as many other nodes in California. Linkage with ARIES after new data warehouse and data migration completed. (6 months out)	$1,360,000	$282,000	About $250,000 annually to maintain system	Participating organizations working on a sustainment plan for when grant funds are no longer available
Santa Clara Santa Cruz San Benito Monterey	CopLink – South Bay Node	Full data integration with CopLink West Bay and South Bay Nodes, as well as nearly all of the other nodes in California. Built ALPR data warehouse. Added facial recognition.	$1,204,000	$350,000	About $250,000 annually to maintain system	Participating organizations have a sustainment plan for when grant funds are no longer available
Alameda Contra Costa Solano	ARIES	Building robust data warehouse to allow access for all Bay Area data sharing systems including NCRIC. Working with CopLink West Bay and NCRIC as partners. Solano is currently sharing data with ARIES and has been invited to join ARIES when new data architecture is mapped and built	$1,008,000	$354,000	About $350,000 annually to maintain system	Numerous Alameda County LEAs to join ARIES including San Joaquin County
San Francisco	Crime Data Warehouse	SFPD has moved from primarily paper based records to a state of the art data warehouse, called Crime Data Warehouse. Initial phases included incidents, mapping, and search. Later phases include field interviews, traffic accidents, and other reports.	$2,000,000	0	No further UASI funds requested at this time.	Working with FBI N-DEX to share data, and in turn will share with CopLink and ARIES.
